

## Installation Steps for Luxaire Fans

**Step 1:** Make 12''X12'' opening in the false ceiling.

**Step 2:** Prepare a 12''X12'' box with at least 19mm thick plywood which can hold at least 75kgs weight and the depth of the box would be the height between the RCC & the FC. The box would need to sit at the level of the FC - Flush to the FC

**Step 3:** Fix this Plywood box to the RCC ceiling firmly in the opening made by us in the ceiling.

**Step 4:** Close the box and continue the painting work.

**NOTE:** Do not forget to leave/pull the electric wire outside the box.
